STRANGE ADVERTISEMENTS.

I have been amazed at the statements made by some credit houses claiming that they sell goods on time as low as any cash house will sell same article. This is trifling with the intelligence of the public, as the most kinorant of our people know that to buy on installments means about double our prices for cash. I have found that no ad pays unless it inspires confidence in the readers, and it must not carry with it any doubt as to the writer's shifting and intentions to do what he claims. We advertise because we believe our ads, are read, and we are just as careful to state absolute facts as if you were looking at the goods and making a purchase.

We are in business for the profit, at the same time we do not consider it all of life to get a dollar. We do business right or not at all. Try to buy these goods anywhere at our prices and onen your eyes to the fact that no house in Washington will meet them.
